

Baa Atoll, 13 May 2022

Dear Esteemed Guest,

Greetings from Finolhu Baa Atoll Maldives!

We would like to inform that we are carrying out two smaller projects during the upcoming months:

Concrete Rectification Work at the Water Villa Jetty

Commencing on 07 May 2022, the works aim to do preventive maintenance on the concrete elements of jetty columns, water villa columns, and beams which is set to be completed by end of June 2022. The outer part of the jetty will be closed involving 22 out of 41 Lagoon Villas and 22 out of 41 Ocean Pool Villas, and two Rockstar villas will not be available to accommodate guests. The utmost efforts will be made to minimize any interference to the remaining water jetty.

Shore Protection at the end of the Sandbank

The work is essential to protect the shore from erosion and it will not be disturbing to the guests in the main island and water villas thanks to the 1.5 km distance between the far end of the sandbank, where the works will be carried out, and the main island and overwater villas. The project is scheduled for completion by the end of October 2022. The Beach Bubble overnight experience may not be available for the new bookings during this time until further notice. Crab Shack restaurant operations and access to it will not be affected.

We would like to ensure that the utmost attention and effort will be taken to minimise the amount of interference in the resort's operations. The guests' comfort remains our highest priority at all times.

We appreciate your continued support during this time, and we sincerely apologise in advance for any inconvenience this may cause.

Feel free to contact us if you require any clarifications on this project. Once again, thank you very much for all your support.

Warmest regards,

Marc Reader
General Manager
